

ECO LITE Line Marker

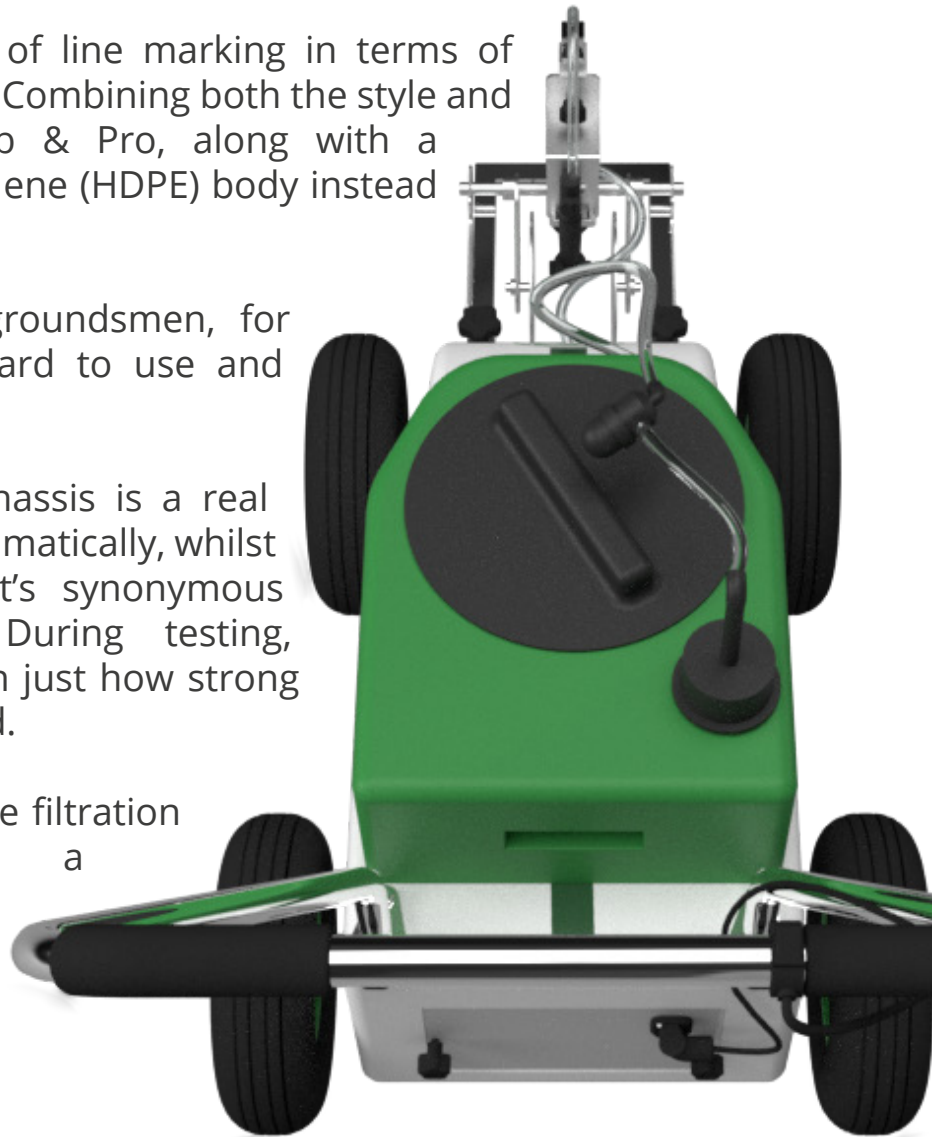

The Eco Lite is at the pinnacle of line marking in terms of appearance, usage, and costings. Combining both the style and engineering from the Eco Club & Pro, along with a new-styled high-density polyethylene (HDPE) body instead of a steel chassis.

The Eco Lite is designed by groundsmen, for groundsmen, so is straightforward to use and easy to maintain for all users.

The newly engineered plastic chassis is a real game changer, reducing costs dramatically, whilst maintaining the sturdiness that's synonymous with the Pitchmark brand. During testing, groundsmen were surprised with just how strong & robust the machine felt in-hand.

Our Eco Lite also boasts a 3-stage filtration system combined with a high-pressure pump for perfect results time after time & pitch after pitch.
