

## FUSION Line Marker

The Fusion is at the pinnacle of line marking in terms of appearance, usage, and costings. Combining both the style and engineering from its older sibling, The Hybrid, along with a new-styled high-density polyethylene (HDPE) body instead of a steel chassis.

The newly engineered plastic chassis is a real game changer, reducing costs dramatically, whilst maintaining the sturdiness that's synonymous with the Pitchmark brand. During testing, groundsmen were surprised with just how strong & robust the machine felt in-hand.

Our Fusion also boasts advanced patent-pending technology on the highly-engineered front wheel, combined with the proven spray system from the Eco range, giving perfect results on the pitch time after time.

This unique three wheeled design, allows the machine to have the manoeuvrability of a wheel-to-wheel marker, whilst having all the benefits and technology of a spray marker.

## Key Features:

- ⊖ The Fusion is a battery-powered spray line marker that applies paint via a pump through a sprayhead and nozzle.
- ⊖ Optional 25L paint tank (as shown)
- ⊖ Designed for use on natural grass surfaces
- ⊖ Manufactured by hand at Pitchmark headquarters in Bristol, UK
- ⊖ The 12v 9ah SLA battery allows the user to mark up to 6 football pitches from one charge
- ⊖ Body holds 1 x 10L or 2 x 5L containers, plus space for aerosol can
- ⊖ External charging point
- ⊖ Adjustable front end and handlebars
- ⊖ 2" (50mm) to 5" (120mm) line width
- ⊖ High-pressure pump combined with 3-stage filtration gives consistent quality lines and fewer blockages
