

THE FOUNDATION OF EXCELLENCE

A research first approach of perfecting turfgrass performance.

Variety information

Description:

Dynamic II tall fescue was developed by Pure-Seed Testing, Inc. Dynamic II is a low-growing tall fescue with tolerance to drought and salinity. Dynamic II is resistant to brown patch, gray leaf spot, net blotch, and stem rust. Dynamic II is a wear tolerant variety that performs well in sun or shade.

Applications:

Dynamic II is well-adapted for lawn-type turfs, especially in the Transition Zone. It may be used for commercial or residential landscapes, parks, sports fields, golf course roughs, roadsides, cemeteries, and soil conservation. Its low growth habit and wear tolerance, along with its disease resistance, make it an excellent choice for these turf uses.

Geographical Adaption:

Dynamic II performs well in the Transition Zone and temperate climates. It is adapted to a wide range of soil types and pH. Recommended seeding rate is 5-8 lb/1000 ft² (245-390 kg/ha). Fertilize at 3-5 lb N/1000 ft²/yr (145-245 kg/ha); mow at 1.5-3.0" (4-8 cm); irrigate deeply and infrequently.

PRODUCT FEATURES

Shade Tolerance	● ● ● ● ●
Brown Patch	● ● ● ● ●
Salt Tolerance	● ● ● ● ●
Wear Tolerance	● ● ● ● ●
