

THE FOUNDATION OF EXCELLENCE

A research first approach of perfecting turfgrass performance.

Variety information

Description:

Inspiration tall fescue was developed by Pure-Seed Testing, Inc. The parents of Inspiration were selected under extreme drought stress. Inspiration has good summer turf performance and resistance to brown patch, gray leaf spot, net blotch, stem rust, and crown rust.

Applications:

Inspiration is adapted for lawns, golf course roughs, cemeteries, parks, sod production, sports fields, roadsides and slope stabilization. Its drought tolerance makes Inspiration especially well-suited for residential or commercial lawns and low-maintenance turf areas. Inspiration performs well in sun or shade.

Geographical Adaption:

Inspiration performs well in the Transition Zone and temperate climates. It is adapted to a wide range of soil types and pH. Recommended seeding rate is 5-8 lb/1000 ft² (245-390 kg/ha). Fertilize at 3-5 lb N/1000 ft²/yr (145-245 kg/ha); mow at 1.5-3.0" (4-8 cm); irrigate deeply and infrequently.

PRODUCT FEATURES

Brown Patch	● ● ● ● ●
Heat Tolerance	● ● ● ● ●
Wear Tolerance	● ● ● ● ●
Salt Tolerance	● ● ● ● ●
Drought Tolerance	● ● ● ● ●
Seeding Rate	5-8 lbs /1000sq. ft (294-490 kg/ha)
