TRANSFER
PAINT

1 | **6.5L**

10L | **2 HDPE** | **12 M** | **16 KG** | **25ºC 10ºC** | (no water) | **10s**

- Transfer is a simple and cost-effective paint designed specifically for natural grass, and blended in the UK from premium raw materials.

- Transfer contains high quality Titanium Dioxide (TiO2) pigment which makes it very bright and white, and advanced polymers to allow the paint to stick to the grass leaf.

- We use extra thickeners to make Transfer easy to stick to the wheel and apply.

- Transfer is water-based, environmentally-friendly, biodegradable and contains minimal VOCs.

- Supplied in 10 litre fully-recyclable HDPE containers.

Paint & Machine Combinations:

Quality	Machine	Paint

Silver	*Classic*	**Lumen**
Gold	HYBRID	**Direct**

MADE IN BRITAIN ®

THE QUEEN'S AWARDS FOR ENTERPRISE: INTERNATIONAL TRADE 2019

Pitchmark Paint vs Industrial Paint:

1 Our paints are specifically designed for natural grass with years of research and development.

2 Our paints do not kill the grass or compact the soil layer.

3 Once dry, you are able to water the pitch without the paint 'rewetting' and spreading across the pitch.

4 Our paints dry much faster than industrial paints.

5 The special polymers in our paints are designed to flex with the grass leaf, so the paint doesn't crack and flake off when the leaf is bent.

6 Our paints do not hinder plant growth or prevent photosynthesis.
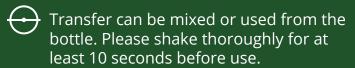

Pitchmark Products Used At:

How To Use:

- Transfer should be applied through a Pitchmark *Classic* marker. This will use approximately 6.5 litres of paint to mark the lines on a full-size adult soccer pitch.

- Each 10L drum will allow you to mark out 2 full-size adult soccer pitches.

- Transfer can be mixed or used from the bottle. Please shake thoroughly for at least 10 seconds before use.

- Transfer should be touch dry in 15 minutes, and fully cured within 30 minutes at 25°C.

Tips:

- Please apply to a dry (or drying) grass leaf.

- Remember to always cut and remove grass clippings before painting the lines.

- If using string-line to help mark out, remember to lift the lines between uses rather than drag them across the surface.

Testimonial:

"I was so impressed that we now use Pitchmark products at both the Parc des Princes and the Camp des Loges training facility, and I couldn't be happier. I'd have no problem recommending Pitchmark to other turf professionals. Their knowledge is second to none and the service and assistance I receive is outstanding."
